About the College:

Jawaharlal Nehru Technological University is imparting quality education to a large number of Undergraduate students every year, seeking admission in various streams of Engineering, Pharmacy, Management including few specializations in applied sciences. Significant number of faculty members are actively involved in the entire process. Apart from the required academic content in the respective domain, the University aimed at all round development of student community by encouraging co-curricular and extra-curricular activities. The University believes the concept of life long learning through various platforms like seminars, workshops, technical fests etc., where knowledge sharing is the primary concern. In the pretext of Globalisation and ever growing competition in the market driven world, all the stake holders are experiencing the real stress leading to diversified pressures and deviations. An immediate need is felt in terms of brain storming activity to address the issues of students in the adolescent age at this juncture. Attention of faculty members on these issues for future direction is a paramount task taken up by JNTUH College of Engineering.

The College has been recognized as a well performing institution with Autonomous status by UGC, New Delhi. The college is imparting technical education in six branches of Engineering by catering to the needs of students from various countries across the world.

The organisation was founded in 2003 and operated by Dr. C.Veerender, A professional counselor, pioneer in lime lighting the teenage - student problems in the state of Andhra Pradesh. You & me strongly believes that "There are no steps to climb the Everest" .

 in the field of counseling and training for students , training teachers, professionals and parents with result-oriented programs full of real-life practice sessions, allowing participants to take the maximum benefit in minimum time.

 conduct the best weekend & regular courses for public speaking & personality development in India. The syllabus or contents of the Personality Development course are designed to improve your confidence levels while speaking in public, remove your fears , enhance your delivery techniques and develop your concentration and total personality. Till now you & me trained more than 3 lakh students in AP and Karnataka states.

For the past seven years as a social responsibility with help of "SPHOORTH" NGO "you & me" organizing "Teenage temptation" emotion awareness programme among the youth in Andhra Pradesh. This year with help of JNTUH College of Engineering, Hyderabad conducting Two days workshop "know your student" .

Two days Workshop on "Know your student"

(adolescent problems and solutions)

India is a country of young population. Children and adolescents comprise the major part of our population. With rapidly changing socio-economic cultural environment there is a need to keep ourselves updated with the current problems faced by young people. All psychologists, teachers have a huge responsibility of steering our great country to the pinnacle of glory. By providing quality teaching we all can empower our next generation.

Teenage is a stage where a person faces and experiences many biological and psychological changes. This is the stage where a child gets into emotional bonding and gets attracted to the opposite sex so easily. At the age of sixteen where they just complete their schooling, they want to have their own world of freedom.

For a large number of teenagers, a violent or unhealthy relationship is their everyday reality. Attraction is natural at this stage but needs a proper judgment about the other person. Many are either unaware of the fact that it is a must to judge the person (especially opposite sex).

Since the globalisation is showing great impact on our daily, the technology reached very nearer to the common man, the teenagers took up the technology to their chest and getting into the addiction to chatting, net browsing, online games, online bettings, pornsites and all other vices inspite of the regular monitoring by the parents and teachers. We have been seeing lying, stealing, having habits of boozing, smoking and using drugs etc they are intruded into youth life in the society.

There is a lot of confusion and suspicious atmosphere prevailing among the youth in the society. Teenage is a perfect stage where we lay path to bright future by acquiring skills and talents. But, at present the youth is in confusion. Every year, around 3000 students commit suicide and physical attacks on girls, due to misinterpretation of relationships, misunderstanding and depression. We would like to bring awareness on student issues among the youth, teachers, parents, lecturers . This will help them in dealing with crises in life and to face the challenges in life and be successful in this competitive World. This workshop is aimed at addressing these issues towards a bright society.
